- User logs
- Modern design and finish
- Easy installation
- Access cards and keyfobs
- Grant or revoke access

Why Choose Millennium Third Party Smart Locks?

Integrating our Millennium **Ultra** software with third-party smart locks offers a myriad of advantages, making it a compelling choice for access control solutions.

- Fortifies your security posture, reducing vulnerabilities and ensuring only authorized individuals gain access.
- Seamless, user-friendly experience, allowing occupants to access buildings and rooms effortlessly through mobile devices or other preferred methods.
- Tailor access control to your specific needs with customizable settings, such as setting access schedules, user permissions, and temporary access codes.
- Manage access remotely, granting or revoking permissions in real-time, which is essential for modern, dynamic environments.
- Keep a detailed record of access events with robust audit trail capabilities, providing transparency and accountability.
- Easily integrate into your existing security infrastructure, minimizing disruptions and reducing the need for costly hardware replacements.
